

SPECIFIC RULES FOR THE TRANSPORT OF PETS ON CABLE CAR SYSTEMS OPERATED BY SESTRIERES S.p.A.

In the summer season the transport of pets is permitted on all cableways that carry pedestrians.

In the winter season, the transport of pets is forbidden on cableways, which are intended for the transport of skiers only, as animals are not allowed on the ski slopes, both for the safety of the animals themselves and for that of skiers. In relation to the safety tests carried out and the potential interference with the ski slopes, the transport of pets during winter is permitted on the following lifts only:

- "Cesana - Ski Lodge" gondola
- "Sestriere - Fraiteve" gondola
- "Pattemouche - Anfiteatro" cableway
- "Cesana - Rafuyel" chairlift
- "Rafuyel - Sagnalonga" chairlift

Only pets can be transported, while the carriage of wild or dangerous animals is strictly forbidden. Each passenger may only accompany one animal.

Pets are allowed access to the transport system on condition that the size and type, as well as the transport system equipment, allow the traveller to transport the animal in complete safety, also taking into account the procedures envisaged for unloading the animal in the event of the activation of procedures to evacuate passengers from the line due to a failure - blockage of the cable system. Responsibility for the transport of the pet always lies with the owner/passenger travelling with the animal, who must take all necessary precautions and ensure their own safety and that of third parties.

The transport of the aforementioned animals may be limited or denied, at the sole discretion of the staff on duty, in the event of crowding or of any risk to passengers.

Furthermore, the animal's access may be delayed by the staff on duty for any reason that makes this appropriate.

A muzzle and lead (max. 1.5 metres long) are required for the transport of dogs, both of which are compulsory for all animals regardless of their size. Alternatively, they may be transported in a closed dog carrier. They may be transported on chairlifts and in cable cars only in a closed carrier.

If the animal soils or damages the vehicle or causes harm to persons or property in any way, the owner is obliged to pay compensation for the damage.

Access to cableways with pets is subject to the purchase of a specific ticket, with which the pet's owner or the person accompanying the pet declares compliance with the specific transport methods described above, assuming full responsibility.

The ticket is free of charge for small animals (indicative size limit of 50x30 cm) that can be carried in the arms of the owner/accompanying person. Medium and large animals exceeding the measurements indicated above require the purchase of a specific ticket. The travel methods described above may be waived for assistance dogs (guide dogs for the blind and deaf, dogs trained to support disabled persons), dogs belonging to the

armed forces, police, civil defence and fire brigades. Free travel tickets are issued for these categories of dogs.

I, _____

born in _____ (____) on _____

Resident in _____ (____) Address _____

Tax Code _____

with the purchase of the ticket for the transport of the pet _____ (indicate type) on the cableways operated by Sestrieres S.p.A.

HEREBY DECLARE THAT

- I have read and fully accept the specific rules governing the transport of pets on the above-mentioned cableways;
- I undertake to comply strictly with the instructions given by the staff in charge of operating the cableway system, observing the specific instructions given to ensure the respect of the safety of the transport system and of the passengers transported;
- the journey of the pet takes place under my full responsibility and I undertake to indemnify the operating company and any third parties for any damage caused by the pet during the journey and in the pre-boarding and post-landing phases within the areas of the cableway stations;
- I am aware that the cableway is located in a mountainous area, at a high altitude, with weather conditions that may be harsh for passengers and pets;
- I am aware that, if the cableway becomes blocked due to a failure or for other causes (power failure, strong wind, etc.) it may be necessary to spend several hours in the cable car, during which I undertake to keep the animal calm and take care of it in complete safety, while waiting for the system to restart or to be evacuated from the line;
- I am aware that, if the system cannot restart due to failure or other causes, procedures will be activated by the rescue service to evacuate passengers from the line, lowering them to the ground on a rope. The pet will be lowered by authorised personnel in accordance with the procedures envisaged by the specific rescue plan and in relation to the type and size of the animal, with the possible intervention of a vet for preventive sedation of the animal before it is lowered to the ground, with costs and expenses to be borne in full by the owner/person accompanying the animal.
